ABSTRACT

Two hundred thirty-two references on parking management are listed in accordance with 16 subject areas to provide sources to supplement the study findings that are documented in a separate report.

FOREWORD

The results of the research study entitled "Traffic Restraints: An Evaluation of Parking Controls" are reported in two documents. The primary findings and study method are described in the report "Evaluation of Parking Management Strategies for Urban Areas" by Martin R. Parker and Michael J. Demetsky, while a complete list of references by subject area is given in this report.

SELECTED BIBLIOGRAPHY ON PARKING MANAGEMENT

by

Martin R. Parker, Jr.
Research Scientist

and

Michael J. Demetsky
Faculty Research Scientist

There are many published documents relevant to the use, impacts, and problems with implementing parking management and support strategies. These documents have been categorized into the following subject areas to aid those who wish to obtain information beyond that provided in the primary report.

<u>Section</u>	<u>Subject Area</u>	<u>Page</u>
A	Parking Studies-----	2
B	Bibliographies on Parking-----	6
C	Parking Management Programs-----	7
D	Parking and Mode Choice-----	9
E	Parking Pricing-----	11
F	Parking Strategies and Environmental Quality----	12
G	Impact of Parking Strategies-----	14
H	Fringe Parking-----	15
I	Parking Management Planning-----	17
J	Methods of Evaluating Parking Strategies-----	18
K	Parking Models-----	19
L	Loading Terminals in Urban Areas-----	20
M	Urban Transportation Planning-----	21
N	Transportation Systems Management Strategies----	22
O	Methods for Limiting Traffic-----	23
P	Methods for Improving Transit Service-----	26
