ACKNOWLEDGEMENTS

The author expresses appreciation to all of the persons whose efforts contributed to the completion of this report. Particularly, the author acknowledges the efforts of Jim Collins, Carey Arthur, P. K. Doll, and R. E. Christy, who provided much information and guidance for this study; Vince Burgess, Mike Worthington, and Stuart Napier, who helped in the development of this study; the members of the Safety Group, who helped in the planning and review of this report; Jeanne Roberts, who worked from handwritten material to prepare this report; Harry Craft and the Report Section, who readied this report for publication; and Margie Jernigan, whose support and confidence serve to encourage the author daily.

EXECUTIVE SUMMARY

Traffic safety efforts have been quite successful over the years in reducing the death toll on Virginia's roads and highways. The average number of persons killed annually in traffic crashes was down from 1,183 in the latter half of the 1960's to 970 for the first half of the 1980's. However, from 1982 to 1984, traffic crashes in Virginia rose 9.7% and injuries and fatalities increased 16.2% and 15.1%, respectively.

In an attempt to combat these recent increases in crashes, injuries, and fatalities, the Transportation Safety Administration of the Virginia Department of Motor Vehicles (DMV) entered into an agreement with the National Highway Traffic Safety Administration, in October 1985, to initiate the Comprehensive Community-Based Traffic Safety Program. The comprehensive program relies on problem identification and program assessment in combining state and local resources to target traffic safety problems.

Two DMV districts, District 2 and District 7, were selected as pilot areas for implementation of the comprehensive program. In June 1986, Phase I, the problem identification phase, was completed. Phase II, the program assessment phase, is designed to identify community resources and address the recommendation made in Phase I, that initial countermeasures should target the program areas of occupant protection, alcohol, selective enforcement, and pedestrian safety. Programs and organizations identified through Phase II were compiled into resource inventories, which are found in Appendix B for District 2 and Appendix C for District 7.

The forthcoming final report will provide a more comprehensive list of programs and organizations concerned with promoting traffic safety, which are to be identified through continuing research efforts. Also, the final report will detail specific program areas of interest for each organization identified.

INTERIM REPORT

THE COMPREHENSIVE COMMUNITY-BASED TRAFFIC SAFETY PROGRAM
PHASE II: PROGRAM ASSESSMENT FOR DISTRICT 2 AND DISTRICT 7

by

Jack D. Jernigan
Assistant Research Scientist

INTRODUCTION

Traffic safety efforts have been quite successful over the years in reducing the death toll on Virginia's roads and highways. The average number of persons killed annually in traffic crashes was down from 1,183 in the latter half of the 1960's to 970 for the first half of the 1980's.(1) Moreover, because there are more vehicles logging more miles today than during the 1960's, the average annual death rate per 100 million vehicle miles of travel has been cut more than 50%, from approximately 5.02 during the latter 1960's to 2.45 during the early 1980's.(1) Clearly many factors are involved in this dramatic reduction in traffic fatalities, but much of the reduction is the result of a comprehensive effort to improve traffic safety through promoting emergency medical services and through promoting safer vehicles, roadways, and drivers.

While the history of traffic safety efforts is impressive, recent trends may signal that increased efforts are needed. From 1982 to 1984, traffic crashes in Virginia rose 9.7% and injuries and fatalities increased 16.2% and 15.1%, respectively.(1) In fact, between 1974 and 1984 annual traffic injuries rose more than 40%, from 48,144 to 69,306.(1)

Unfortunately, these recent increases have occurred at a time when traffic safety dollars, along with monies for many governmentally supported programs, are at a premium. Hence, targeting monies where they will have the greatest potential impact has become of paramount importance.

Currently, highway safety programs are initiated at the local level, which, in theory, gives localities the freedom to match countermeasure programs to local needs. Yet this approach dictates that localities have adequate data and resources available to identify crash problems and judge the impact of countermeasure programs. In fact, adequate data and resources historically have been either lacking or nonexistent. Thus, one failing of the current system is that it is

virtually impossible to determine whether priority traffic safety problems are being addressed in an effective manner, if at all.

In October 1985, the Transportation Safety Administration of the Virginia Department of Motor Vehicles (TSA/DMV) entered into an agreement with the National Highway Traffic Safety Administration (NHTSA) to initiate the Comprehensive Community-Based Traffic Safety Program (CCBP). The CCBP is designed to combat the shortcomings of the current system by combining state and local resources to identify and locate crash problems in localities and to rank those problems according to the order in which they need to be addressed. Further, the CCBP relies on identifying current countermeasure programs and concerned organizations and individuals, as well as other potential resources, and then building upon the existing local base.

Two DMV districts, District 2 and District 7, were selected as the pilot areas for implementation of the CCBP. In June 1986, the initial problem identification phase of the CCBP was completed by the Virginia Highway and Transportation Research Council for the TSA/DMV using only data available at the state level.(2) In the current phase of the CCBP, local data and community resources are being identified to supplement the initial problem identification findings. Through knowing which programs and organizations are promoting traffic safety, the CCBP can build upon existing networks.

In a time of financial belt tightening, building upon existing resources is attractive in that it should provide a net savings. That is, community resources can be identified more easily and less expensively than they can be developed. In addition, an assessment of these community resources permits monies to be targeted where they might have the greatest potential impact through identifying programs and organizations which have shown an active interest in promoting traffic safety.

The major objectives of the program assessment phase of the CCBP are to supplement the recommendations of Phase I by --

1. identifying local resources (e.g., programs, organizations, individuals) in DMV District 2 and District 7 which have the potential to promote traffic safety,
2. providing a brief administrative assessment of organizations and programs concerned with promoting traffic safety, and
3. identifying local data sources which could help pinpoint high accident locations and other traffic safety problems in urban areas.

METHODOLOGY

The initial step of this phase of the CCBP was to define an optimal set of data which could be used in meeting the objectives of this project and the CCBP. Referring to the needs identified in Phase I of the program,(2) and to guidelines established by the NHTSA,(3) the researcher developed a needs list for this phase of the CCBP. The transportation safety administrator, the transportation safety planner, the transportation program evaluation manager, and the DMV district managers and transportation safety field coordinators from the two pilot districts reviewed the list, collectively met with the researcher, and agreed upon the needs list contained in Appendix A. Further, it was decided that rather than develop and administer a questionnaire, telephone and in-person interviews should be used to supplement specific mailed requests in acquiring information. Key individuals from whom information would be requested would also be recruited to support the program during the initial contact. Hence, because of the critical dual role of the initial communication, it was decided that no effort should be made to acquire information from within the localities until after the state coordinator and catalyst positions of the CCBP had been filled. Thus, the data used in this report were acquired solely from statewide representatives of agencies and programs of interest, published sources, and the transportation safety field coordinators.

Because identifying local community resources is a primary concern of this study, one of the more important outcomes of this research would be an inventory of organizations, programs, and key individuals interested in promoting traffic safety. Appendix B and Appendix C display the program assessment resource inventories for District 2 and District 7, respectively. The resource inventories are subdivided into the different target areas in which each organization has an interest.

Because location-specific crash data for urban areas are available only at the local level, if at all, and because no local contacts have yet been made, high accident locations in urban areas are not identified in this report. After the CCBP state coordinator and catalysts begin work, attempts will be made to identify urban crash data and high accident locations.

INTERIM FINDINGS

The initial interviews, data requests, and data searches have concentrated on the areas of occupant protection, alcohol, selective enforcement, and pedestrian safety, which were targeted in Phase I.(2) Preliminary data indicate that occupant protection has received much attention in each of the two pilot districts. Hospitals, especially, are involved in programs making child safety seats available on loan. A recent report by the Virginia Commonwealth University Transportation

Safety Training Center identified 9 hospitals in District 2 and 8 in District 7 as having such a program.(4) Further, both districts have had some occupant protection activity involving public information and education.

Many alcohol countermeasures are ongoing and effective throughout these districts, and throughout the Commonwealth. Each locality is covered under an Alcohol Safety Action Program (ASAP), which represents one of the more comprehensive alcohol countermeasure efforts in the nation. In addition, both districts have community groups which promote activities aimed at reducing the incidence of drinking and driving.

Several communities within the pilot districts have received Selective Traffic Enforcement Program (STEP) grants in recent years. Since FY 1982, speed STEP grants have been awarded to Franklin County, Lynchburg, Roanoke County, and the towns of Rocky Mount and Vinton in District 2, and to Chesapeake, Norfolk, Portsmouth, and Virginia Beach in District 7. However, three successive years of speed STEP evaluations, for fiscal years 1982, 1983, and 1984, indicated that many projects failed to concentrate enforcement efforts on sites, days, and times which presented an identifiable crash problem.(5,6,7) Thus, while some localities may be familiar with selective enforcement projects, work may be needed to convince enforcement officials to target specific high accident locations, days, and times.

In both districts, the American Automobile Association (AAA) is heavily involved in promoting pedestrian safety. Because, nationwide, most pedestrian deaths occur in urban areas, the AAA has chosen to concentrate its efforts in pedestrian safety in urban areas only. Much of the pedestrian safety effort involves providing public information and education, particularly through the schools.

Other than the four aforementioned areas of emphasis, Phase I recommended that the CCBP work through citizen advisory committees and work toward establishing a traffic safety hot line accessible in each district. Though both districts are served by active local transportation safety commissions, citizen advisory committees should help in focusing the activities of the comprehensive program. Also, while the CCBP staff should try to establish and foster a close relationship with the media, it may be possible for a traffic safety hot line to be linked with the current help line operated by the Virginia Department of Highways and Transportation (VDH&T). Because the VDH&T help line has only recently been created, a mutually beneficial arrangement may be possible if the CCBP staff is willing, and able, to address traffic safety questions and concerns. However, it is the opinion of the author that establishing hot lines in cooperation with the press would be the more beneficial strategy for the comprehensive program. That is, a hot line operated in cooperation with the press would provide a considerable amount of public exposure for the program,

as well as for traffic safety in general, which would not be provided through the VDH&T help line.

FUTURE OBJECTIVES

Between the writing of this interim report and the presentation of the final report, the researcher will --

1. contact local programs and organizations on behalf of the CCBP,
2. investigate and assess the activities of identified programs and organizations actively promoting traffic safety, and
3. locate urban crash data and identify urban high accident locations.

APPENDIX A
PROGRAM ASSESSMENT NEEDS LIST

PROGRAM ASSESSMENT NEEDS LIST

I. Community Information

- A. Who are the members of the local transportation safety commissions?
 - 1. Names, addresses, and phone numbers of members.
 - 2. Positions held on commission (chairman, secretary, etc.).
 - 3. Business, agency, and community affiliations of members.
 - 4. How often does each commission meet?

- B. Are there other coordinating or advisory groups?
 - 1. What are those groups?
 - 2. Who sponsors them?
 - 3. How is each used?
 - 4. How often do they meet?
 - 5. Contact person (name, address, phone number).

- C. What groups, businesses, or agencies have shown an interest in promoting traffic safety?
 - 1. Name of group, business, or agency.
 - 2. What is each interested in doing?
 - 3. Contact person (name, address, phone number).

- D. In urban areas, what local police departments keep location-specific data on crashes in their communities?
 - 1. For each department, who is in charge of keeping the data (name, address, phone number)?
 - 2. What type of system is used (computer, pin map, etc.)?
 - 3. Are summary reports of the data available?
 - 4. Are the data available?

- E. Who should be contacted should a roadway, traffic signal, traffic sign, or some fixed object need attention (i.e., who is in charge of reporting and/or correcting engineering problems)?
 - 1. Name, address, and phone number of person(s) responsible.
 - 2. Position held.

II. Alcohol

- A. Which localities have special DUI enforcement efforts?
 - 1. Locality.

- 444
2. Type of program and goal of program.
 3. Over what time frame?
 4. Contact person (name, address, phone number).
- B. Who has or may sponsor DUI educational programs.
1. Groups, agencies, and businesses that have shown an interest in sponsoring DUI educational programs.
 2. Type of program and goal of program.
 3. Over what time frame?
 4. Participation levels.
 5. Contact person (name, address, phone number).
- C. What are the local alcohol treatment programs?
1. VASAP
 - a. Directors (name, address, phone number).
 - b. Participation levels.
 2. Other programs.
 - a. Name of program.
 - b. Sponsor.
 - c. Type of program and goal of program.
 - d. Over what time frame?
 - e. Participation levels.
 - f. Contact person (name, address, phone number).
- D. Other groups concerned with combating DUI.
1. Group, business, or agency.
 2. How interested in combating DUI.
 3. Contact person (name, address, phone number).
- E. Other countermeasure programs which combat DUI.
1. Sponsor.
 2. Type of program and goal of program.
 3. Over what time frame?
 4. Participation levels.
 5. Contact person (name, address, phone number).
- F. Drunken Driving Media Campaigns
1. Sponsoring agencies (media or other).
 2. Type of coverage or type of program.
 3. Over what time frame?
 4. Contact person (name, address, phone number).

III. Occupant Protection

A. Employer Programs

- 1. Sponsor.
- 2. Type of program.
- 3. Over what time frame?
- 4. Participation levels.
- 5. Contact person (name, address, phone number).

B. Community Programs

- 1. Sponsor.
- 2. Type of program.
- 3. Over what time frame?
- 4. Participation levels.
- 5. Contact person (name, address, phone number).

C. Child Restraint Loaner Programs

- 1. Sponsor.
- 2. Number of seats available.
- 3. Does program have an educational component?
- 4. Participation levels.
- 5. Contact person (name, address, phone number).

D. Safety Belt Awareness Programs

- 1. Sponsor.
- 2. Type of program and goal of program.
- 3. Over what time frame?
- 4. Participation levels.
- 5. Contact person (name, address, phone number).

E. Media Campaigns

- 1. Sponsor.
- 2. Type of campaign.
- 3. Media used.
- 4. Over what time frame?
- 5. Contact person (name, address, phone number).

IV. Police Traffic Services

A. Crash Investigation Policies

- 1. Locality.
- 2. When are reports completed?
 - a. When filled out?
 - b. When turned in?

3. Contact person (name, address, phone number).

B. Which localities run selective enforcement programs?

- 1. Locality.
- 2. What offenses are selectively enforced?
- 3. How often used?
- 4. Where used?
- 5. Times of day used/days of weeks used.
- 6. Over what time frame?
- 7. Are efforts advertised?
- 8. Contact person (name, address, phone number).

C. What crash investigation training is given local enforcement officials?

- 1. Locality.
- 2. Type of training.
- 3. Who gets it?
- 4. Are there refresher courses?
 - a. Are they required?
 - b. How often are refresher courses given?
- 5. Content of training (emphasis areas).
- 6. Length of training course.
- 7. Contact person (name, address, phone number).

D. Public Information and Education

- 1. Are special enforcement efforts publicized?
 - a. In which localities?
 - b. Which efforts are publicized?
 - c. Publicity used.
 - d. Media used.
 - e. Type of advertisement used.
 - f. Publicity used over what time frame?
- 3. Are there other public information and education efforts?
 - a. Type of program and goal of program.
 - b. Over what time frame?
- 4. Contact person (name, address, phone number).

V. Emergency Medical Services

- A. What is the local fatal/injury ratio?
- B. What is the local average response time?

- 447
- C. Is there a local EMS plan?
 - 1. Where does one exist?
 - 2. What is the plan?
 - 3. Contact person (name, address, phone number).
 - D. In what communities does "911" operate?
 - E. What types of EMS training are available?
 - 1. Who gets it?
 - 2. Content of training.
 - 3. Length of training.
 - 4. How often are people retrained?
 - 5. Contact person (name, address, phone number).
 - F. What emergency equipment is available?
 - 1. Types available (trucks, ambulances, cardiac units, etc.).
 - 2. How much equipment is available?
 - 3. How much equipment/population?
 - 4. How much equipment/square mile?
 - 5. Contact person (name, address, phone number).
 - G. Where are the trauma facilities located?
 - 1. Which hospitals?
 - 2. Is there a helicopter available?
 - 3. What special services, equipment, and training are available?
 - 4. Contact person (name, address, phone number).
 - H. What are the public information programs in use?
 - 1. Media campaigns.
 - a. Type of campaign.
 - b. Media involved.
 - c. Sponsor.
 - d. Over what time frame?
 - e. Contact person (name, address, phone number).
 - 2. What are some other ads?
 - a. Type of campaign?
 - b. Sponsor.
 - c. Over what time frame?
 - e. Contact person (name, address, phone number).

VI. Motorcycle Safety

- A. What is the extent of the local motorcycle crash problem?
 - 1. Where do crashes occur?
 - 2. What times of day and days of the week are most often involved?
- B. What motorcycle training or safety programs are offered?
 - 1. Name of program.
 - 2. Sponsor.
 - 3. Type of training offered.
 - 4. Duration of training or program.
 - 5. Participation levels.
 - 6. Over what time frame?
 - 7. Contact person (name, address, phone number).
- C. What are the other countermeasure programs?
 - 1. Sponsor.
 - 2. Type of program and goal of program.
 - 3. Over what time frame?
 - 4. Contact person (name, address, phone number).

VII. Pedestrian Safety

- A. What is the extent of the local pedestrian crash problem?
 - 1. Where do pedestrian conflicts occur most often?
 - 2. What times of day and days of week are most often involved?
 - 3. What age groups are most often involved?
- B. What pedestrian safety courses are offered?
 - 1. Name of course.
 - 2. Sponsor.
 - 3. Type of course.
 - 4. Duration of course.
 - 5. Participation levels.
 - 6. Over what time frame?
 - 7. Contact person (name, address, phone number).
- C. What are the other countermeasure programs?
 - 1. Sponsor.
 - 2. Type of program and goal of program.
 - 3. Over what time frame?

- 44
4. Contact person (name, address, phone number).

VIII. Location Data

- A. Where do crashes most often occur?
 1. Top 5-10 locations of crashes.
 2. Top 5-10 locations of fatal and injury crashes.
 3. Routes with abnormally high crash rates, normalized for ADT.
- B. Where to acquire needed data.
 1. Are the data available?
 2. Who is in charge of the data?
 3. Are there model reports or summary reports?
 - a. Can we get them?
 - b. Can we get the data?
 4. Contact person (name, address, phone number).

APPENDIX B

DISTRICT 2 RESOURCE INVENTORY

Child Safety Seat Programs

AAA of Virginia (in conjunction with Danville Jaycees)

Contact: Ms. M. R. Warren
Address: P. O. Box 600
Danville, Virginia 24523
Seats: 100 Infant, 200 Toddler
Charge: \$9 deposit, \$9 per month

Appomattox/Campbell County Health Department

Contact: Ms. Willie Young, RN
Address: P.O. Box 160
Rustburg, Virginia 24588
Telephone: (804) 847-0961 (Campbell)
(804) 369-5701 (Altavista)
(804) 376-3398 (Brookneal)
(804) 352-2313 (Appomattox)
Seats: 20 Infant, 20 Toddler per county
Charge: None

Bedford County Department of Social Services

Contact: Ms. Ann Thomas
Address: Burks Scott Building
Bedford, Virginia 24523
Telephone: (703) 586-2777
Seats: 6 Convertible - only to foster parents
Charge: None

Community Hospital of Roanoke Valley

Contact: Ms. Christine Bartee
Address: 101 Elm Avenue
P.O. Box 12946
Roanoke, Virginia 24029
Telephone: (703) 985-8000
Seats: 500 Infant - only to discharged OB patients
Charge: None

Giles Memorial Hospital

Contact: Ms. Beverly Craig
Address: 235 Buchanan Street
Pearisburg, Virginia 24134
Telephone: (703) 921-1611
Seats: 2 Infant
Charge: None

Henry County Department of Social Services

Contact: Ms. Alice T. Price
Address: P.O. Drawer 788
Collinsville, Virginia 24078
Telephone: (703) 632-6373
Seats: 2 Infant, 1 Toddler - only to foster parents
Charge: None

Henry - Martinsville Health Department

Contact: Ms. Shirley Coleman
Address: P.O. Box 1032
Martinsville, Virginia 24114
Telephone: (703) 638-2311
Seats: 150 Convertible - only to eligible income range
Charge: None

Lewis - Gale Hospital

Contact: Ms. Kathy Williams
Address: 1900 Electric Road
Salem, Virginia 24051
Telephone: (703) 989-4261
Seats: 300 Infant, 243 Toddler
Charge: Infant \$10 per 6 months; Toddler for discount sale

Montgomery County Hospital

Contact: Ms. Lelia M. McCormick
Address: Route 460 South
Blacksburg, Virginia 24060
Telephone: (703) 951-1111
Seats: 20 Infant
Charge: \$20 deposit

R. J. Reynolds Hospital

Contact: Ms. Susan B. Netherland
Address: Route 2, Box 11
Stuart, Virginia 24171
Telephone: (703) 694-3151
Seats: 35 Convertible
Charge: None

Radford Community Hospital

Contact: Ms. Donna Ducey, RN
Address: P.O. Box 3527
Radford, Virginia 24143
Telephone: (703) 731-2558
Seats: 1 Infant
Charge: None

Roanoke Memorial Hospital (in conjunction with Junior League)

Contact: Ms. Cheri Hartman
Address: P.O. Box 13367
Roanoke, Virginia 24033
Telephone: (703) 985-0151
Seats: 200 Infant, 200 Convertible
Charge: \$10 deposit, \$5 per 6 months

Virginia Baptist Hospital

Contact: Ms. Joyce Reed, RN
Address: 3300 Rivermont Avenue
Lynchburg, Virginia 24503
Telephone: (804) 522-4000
Seats: 25 Infant, 2 Toddler - only to discharged OB patients
Charge: None
